Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning (AI/ML) with hands-on experience evaluating Large Language Model (LLM) outputs — blind manual annotation, hallucination benchmarking, and prompt-strategy comparison — backed by strong Python, SQL, and C++ programming skills. Seeking AI trainer and data annotation projects: LLM response evaluation, prompt writing, fact-checking, and code-related tasks.

Education

KIET Group of Institutions, Ghaziabad

2024 – 2028

B.Tech in Computer Science — AI/ML Specialization; CGPA: 8.31/10

- Coursework: Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, DBMS, OOPs
- Class XII (CBSE), Siddharth Public School — 93.6% (2022) | Class X (CBSE) — 93.8% (2020)

Experience

Data Analyst

Jun 2026 – Jul 2026

Airkrit India (Formerly Edulyt India)

Remote

- Analyzed credit card transaction data across India, querying and transforming transaction-level records with SQL (joins, window functions, CTEs) to build clean, analysis-ready datasets.
- Used SAS and Python to uncover spending trends, growth patterns, and customer segmentation insights across regions and transaction categories.

Technical Skills

Languages: Python (primary), C++, SQL, Dart

ML / DL Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, LightGBM, Prophet, NumPy, Pandas, Matplotlib, Seaborn

LLM Evaluation & Annotation: LLM Output Evaluation, Manual Annotation, Prompt Engineering, Hallucination Detection, BLEU / ROUGE / BERTScore, Benchmarking, Fact-Checking

GenAI / NLP: Transformers & Attention Mechanisms, LangChain, HuggingFace Transformers, RAG Pipelines, FAISS, Groq / Mistral / HF Inference APIs

Data Analytics & BI: SAS, Tableau, Microsoft Power BI, Data Analysis & Visualization, Statistical Analysis, EDA

Tools, Platforms & Cloud: Git/GitHub, Flask, FastAPI, Streamlit, Gradio, Docker, Jupyter, Google Colab, AWS, PyPortfolioOpt

Research

Step Order Sensitivity in Chain-of-Thought Reasoning

2026

Independent Research

[GitHub](#)

- Tested whether reversing or shuffling correct CoT steps hurts accuracy across 5 open-weight LLMs on a stratified 100-problem GSM8K subset, using McNemar's tests with Bonferroni correction.
- Blind-annotated responses against a rubric to classify failure modes; found aggregate “robustness” scores masked a self-break mode in 50% of degraded responses.
- Wrote a full LaTeX manuscript and a 1,500+ line lab notebook for reproducibility.

Projects

MiniGPT — Lightweight Transformer Framework

[GitHub](#)

PyTorch, NLP, Deep Learning

- Built a GPT-style transformer from scratch (causal multi-head attention, positional embeddings, autoregressive generation) with custom tokenization, trained on 1M+ tokens.

#50DaysOfGenAI — Build-in-Public Challenge

[GitHub](#)

LangChain, HuggingFace, RAG

- Documented 40+ public builds, including a hallucination benchmark on flan-t5-base.
- Ran BLEU/ROUGE/BERTScore analysis exposing metric blind spots, plus a semantic-vs-keyword-vs-hybrid retrieval benchmark on FiQA.

Stock ML Dashboard

[GitHub](#)

LightGBM, Prophet, Streamlit, PyPortfolioOpt

- Trained per-ticker LightGBM classifiers with walk-forward cross-validation on 2020–2025 data (no leakage), using 14 technical indicators and 30-day Prophet forecasts.
- Deployed a Streamlit dashboard with equity curve, drawdown analysis, and SQLite backtest logging.

Certifications

AWS Certified Cloud Practitioner — Amazon Web Services (Feb 2026 – Feb 2029)

Achievements & Activities

- Active contributor, College AI/ML Club — delivered an “Intro to NLP with Scikit-learn” session to 40+ junior students.
- Competed in Kaggle's “Orbit Wars” 2D real-time-strategy competition (\$50K prize pool); best agent reached an 85% local win rate with zero invalid moves using logarithmic fleet-speed modeling and angle-based threat detection.
